SUMMARY

Energetic and curiosity-driven Mobile app developer with 5+ years of experience writing top-quality clean code for high-paced businesses. Possess demonstrable ability to cultivate relationships with different stakeholders within an organization with empathetic communication skills and a penchant for solving problems. Eager to support your organization in modernizing its world-class products and delivering an incredible user experience. In previous roles, I have worked on a Healthcare product mobile application that is being used by millions of users daily.

PROFESSIONAL SKILLS

- Fast learner, ready to learn and implement the latest tech stack and best practices.

- Strong problem solver with the ability to work across internal and external teams of all levels.

- Follows POC driven approach while research.

- Compelling communicator both written and verbal; communicating with C/VP level audiences.

- Filled to the brim with an "I am ready" attitude to "roll up your sleeves" for all kinds of challenges.

CORE TECHNICAL SKILLS

Software Engineer KPIs, Native Android development, Kotlin, Java, Flutter development, Mobile development life cycle, User experience design, Application architecture (MVVM/MVC), Agile software development methodologies, Version control (Git/Bitbucket), RESTful Apis, Continues development continues delivery (CI/CD), Quality Assurance, Push Notification, Google Admob integration, Payment gateway integration, Software-as-a-service(SaaS), Enterprise Software, Android Studio, Requirement Gathering, Technical Support, Microsoft Office, Product Demonstrations.

WORK EXPERIENCE

Software Engineer II, My Personal Health Record Express   **July 2020 – April 2022**

At MPHRx, I was responsible for managing the phlebotomist app modules. I worked with Executives & Managers from the development team, business team and solution engineering team to deploy the solution on their end. For any technical, product or QA support, I acted as the first point of contact to provide a resolution to their queries. As a part of the mobile team I regularly done research to streamline the development process and provided POC for the latest developments to the respective manager. Some of the highlights of my works are: -

- Collaborated with internal teams, including Product Managers, QA testers, Solution engineering team, platform team and design team.

- Successfully developed and supported product agile development cycles and exceeded expectations in the yearly performance review.

- Managed to upgrade legacy live tracking system in an efficient way by which cost for providing this feature to customer reduced near to Zero.

- Provided solutions for reducing product build time to increase team productivity.

- Automated build deployment and sharing with respective team members using Firebase distribution and Jenkins.

- Maintained and updated legacy code on time.

- Documented the latest features to effectively train the new and existing team members.

Achievements:

- Reduced build time up to 80 percent to increase team productivity.

- Enhanced live tracking feature in product to reduce Google API cost (reduced to under 200$(waved off by Google), which was above 1000$ earlier)

Android Developer, Snowflakes   **April 2019 – June 2020**

For this role at Snowflakes, I handled native as well as hybrid mobile application. I got a chance to have calls with clients directly to discuss the problem statements and provided solution to them. Some of the highlights of my works are: -

- Took initiative to develop cross platform mobile apps using Flutter.

- Developed and published multiple applications such as Social media, real estate, Inventory management etc.

- Handled multiple projects individually.

- Collaborated with web team to streamline the development process.

- Modified 3rd party/Open source apis and integrated in individual apps as per requirements

- Had calls with clients to understand the problem statements and provided wireframes.

Android Developer, Netgains   **March 2017 – April 2019**

At Netgains, I was responsible for developing android apps as full stack developer. I managed to develop complete mobile applications including RESTful API development to connect android app with server. Furthermore, I got an opportunity to mentor trainees. Some of the highlights of my works are: -

- Provided support as a full stack android app developer. Developed Rest api using PHP.

- Developed and published multiple applications such as Social media, real estate and small android games.

- Handled multiple projects individually.

- Mentored interns.

EDUCATION

Georgian College   **May 2022 – Dec 2022**

Post Graduate Certificate degree, Mobile application development

Punjab Technical University   **Aug 2013 – May 2017**

Bachelor of Technology, Computer Science Engineering
